PROFESSIONAL SUMMARY

Full Stack Developer and 2026 CSE graduate (CGPA 8.92) with hands-on internship experience and 2 production-deployed full-stack web applications. Proficient in the MERN stack (MongoDB, Express.js, Node.js, React.js), RESTful API design, JWT-based authentication, RBAC, and Git/GitHub. Experienced in building scalable backend systems with automated workflows, role-based access control, and data integrity mechanisms.

TECHNICAL SKILLS

Languages: Java (DSA & Problem Solving), JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, RBAC

Databases: MongoDB (Atlas), MySQL

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, VS Code

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

IT Helpdesk & Asset Management System

[GitHub](#) / [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, JWT, Tailwind CSS, node-cron

- Developed a centralized full-stack IT helpdesk platform supporting three roles — Employee, IT Engineer, and Admin — with JWT-based authentication and role-based access control (RBAC) enforced on every API endpoint.
- Implemented a backend-enforced ticket lifecycle state machine with SLA-based deadline tracking, automated overdue detection via node-cron scheduled jobs, and real-time escalation workflows.
- Built an asset lifecycle management module handling assignment, return, and repair workflows with an auditable AssetHistory collection for full traceability.

Inventory & Procurement Management System

[GitHub](#) / [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, JWT, Tailwind CSS

- Developed a full-stack inventory and procurement platform with separate authentication flows for internal users and suppliers, and RBAC enforcing procurement approval hierarchy.
- Implemented an approval-driven procurement workflow covering low-stock detection → purchase requests → multi-level approvals → purchase orders → goods receipt, with MongoDB transactions ensuring multi-step operation atomicity.
- Built an append-only StockMovement ledger for complete inventory traceability; applied CORS restrictions, input validation, and paginated API responses for backend reliability and security.

INTERNSHIP

Front-End Developer Intern

Feb 2026 – Apr 2026

Elbert Tech Technologies – Hyderabad (Remote)

- Developed responsive UI components for web applications using React.js, focusing on cross-device compatibility and usability.
- Integrated RESTful APIs to enable dynamic data retrieval and seamless frontend–backend interaction.
- Debugged and resolved UI issues to improve application stability and user experience.

EDUCATION

B.Tech — Computer Science Engineering

2022 – 2026

Madanapalle Institute of Technology and Science, Madanapalle, Andhra Pradesh

CGPA: 8.92

CERTIFICATIONS

- Placement Training Program — [GeeksforGeeks](#) | 2025
